# ABOUT US

---

Dinotic Energy is a South African-based wholesale distribution company established in 2008.

The company specializes in the distribution of various energy sources including Petrol, Diesel, LP Gas, and IP Wholesale. Dinotec Energy has established itself as a trusted supplier of energy products in the South African market, providing reliable and cost-effective solutions to meet the needs of its customers.

# VISION

---

Dinotic Energy aims to be a leading distributor of energy products in South Africa, delivering innovative solutions to meet the evolving needs of our customers while maintaining a commitment to sustainability and social responsibility.

# MISSION

---

Our mission is to provide our customers with high-quality energy products at competitive prices, while ensuring the highest level of service and customer satisfaction. We are committed to building long-term relationships with our customers and suppliers based on trust, reliability, and integrity.

Dinotic Energy has a team of experienced professionals who are dedicated to ensuring the company's success by providing exceptional customer service, maintaining high-quality products, and embracing innovative technologies to improve efficiency and productivity.

The company's goal is to continue to expand its operations and reach new markets while maintaining its commitment to quality and sustainability. Dinotic Energy aims to play a key role in South Africa's energy industry by providing reliable and cost-effective solutions to meet the needs of businesses and consumers across the country.

# SERVICES

## PETROLEUM

Dinotic Energy has a dedicated and reliable fleet of vehicles that can deliver Petrol in the quantity you need, to a destination that suits you, in an effective, reliable and timeous manner.

## DIESEL

A committed and trustworthy fleet of vehicles owned by Dinotic Energy can efficiently, dependably, and promptly supply Diesel in the quantities you require to any location you choose.

## LP GAS

PGas is important for use in industrial, commercial, agricultural, domestic use, horticultural and manufacturing applications. Dinotic Energy has experience with handling LPGas and is a choice supplier of Bulk LPGas with Safety and good quality.

## IP

Is the most cost-effective forms of burning fuel, and is used by thousands of South Africans. Used mainly for heating, cooling, and cooking, paraffin can be bought in large volumes can be delivered country-wide.

## PETROLEUM

This kerosene-based product has a maximum distillation temperature of 400°F at the 10% recovery point and a final maximum boiling point of 572°F. It meets ASTM Specification D1655 and Military Specifications MIL-T-5624P and MIL-T-83133D (Grades JP-5 and JP-8). Jet A1 is used for commercial and military turbojet aircraft engines.

## DIESEL

Dinotic Energy supplies fit-for-purpose heating fuels typically used in boilers, kilns and furnaces. These applications can be founded in a myriad of industrial business segments. Often our clients are looking for simple solutions for their equipment where consistent quality fuels coupled to reliable and technical services are most important.

## LP GAS

Dinotic BF is a special blend used in a special blend of various low-Sulphur refinery components blended to complete with typical OEM recommended boiler and furnace fuels like kerosene and diesel. LBF is extensively used in small boilers, thermal oil heaters and burners where low viscosity is important and no pre-heating for atomization is required.

## IP

Heavy Furnace Fuel HFO is an industry standard fuel that comes in two viscosities and is manufactured at a major oil refinery. Normal applications for HFO are for those that are not sensitive to ash content and it is used in large boilers, kilns and as a start-up fuel in power generation. This fuel must be pre-heated for atomization and combustion and in applications where nozzle-clogging is prevalent.

# SERVICES

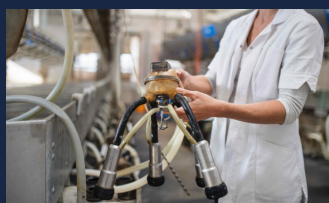

## SOLVENTS

Dinotic Energy sales a wide range of solvents from a number of Oil Chemical suppliers. These solvents are used in the metallurgical industries for liquid extraction of copper and uranium and the formation of degreasing fluids for mining applications.

## FLUIDEN 1582

Fluiden 1582 is a wide cut aliphatic solvent used in paints and polishes where a slow drying rate is required. Due to a slower rate of evaporation it offers some advantages over Fluiden 1520 in cleaning and general solvent usage.

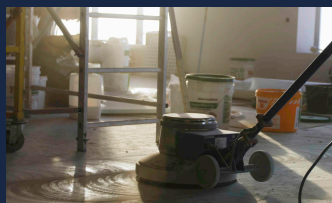

## FLUDEN 1926

Fluiden 1926 is a high-flash kerosene with characteristics similar to Fluiden 1528 and is used as a replacement for FLuiden1528 in applications where a high flash point is required.

## MASIMOSOL 2325

MASIMOSOL 2325 is a wide cut mixture of paraffin, cycloparaffin and aromatics that boils between 220 and 250°C. As a result of its increased boiling range level Masimosol 2325 is considered a high flash, slow-evaporating type of hydrocarbon solvent.

## AH 1925 SOLVENT

AH1925 is a narrow cut solvent used in a wide range of applications including copper solvent extraction, as a diluent and in industrial polishes. Typical characteristics include high flash point and low aromatics.

## DIESEL

In addition to its main products, the Dinotic also offers a range of other chemicals:

- Xylene
- White Spirits
- Hydrochloric Acid
- Sulphuric Acid
- Flocculant
- Toluene
- Frother & Guar
- Benzene
- Phosphoric Acid
- Nitric Acid

# WHY DINOTIC

---

## **SOLID WORK ETHIC:**

Ensuring honesty and integrity within our company is of paramount importance to us. We firmly believe that fostering positive relationships should be a key priority regardless of the outcome of any business transactions.

## **SPEED AND RELIABILITY:**

The success of a company is heavily reliant on its clients. At Dinotic Energy, we prioritize our clients by striving to effectively meet their unique needs and requirements.

## **QUALITY PRODUCTS AND SERVICES:**

Dinotic Energy exclusively offers gas and petroleum products that have undergone rigorous re-validation processes to ensure their safety and suitability for use in the market.

## **VALUE FOR MONEY**

Our company firmly believes in the concept of a "win-win situation" where success is achieved only when all involved parties benefit from a positive outcome.
